There was no old business.

Don suggested the committee look at the data elements outside the norm. Before this discussion occurred Vinie and Dan discussed the development of the data prepared last year.

Dan said he has created a spread sheet with state data from the 16 Districts the same as last year's spreadsheet with 2011 data. Discussed the need to have NASD 2010 data in this new spreadsheet for comparison purposes. Dan agreed to add NASD 2010 data to this new spread sheet and calculate the rankings.

Identified the data elements that were furthest from the norm in the 2010 data.

Discussed the ability of the school board to review and participate in the development of student IEPs.

Discussed future teacher contract negotiations.

Discussed adding 2012 NASD data before it is reported to the state. Dan declined saying the data was not official yet and it was a bad time of the year with his workload.

Next meeting was not set due to the need to review the comparison of the 2010 and 2011 data Dan was going to include in his new spread sheet.

5:00 PM meeting adjourned.
